2018-05-29	Natalie Gordon	Goal 2: Adding technology is not an academic goal. Please review the plan and state what measurable academic improvement will be made through the addition of the technology (example: as part of a math goal, SAGE scores will increase by math classes having greater access to computers and software). Goal 3 and 4: All behavioral goals must be included as part of an academic goal. (Example: Because of before and after school tutoring, positive character assemblies and participating in Rachels Challenge, graduation rates will improve from 17-18 to 18-19 by 2%) Goal 7: Please be more specific on what resources will be provided and how these resources will improve academic excellence at the school.
